PIN-HSUN (CHARLIE) HUANG

Sydney, NSW | (+61) 432 562 636 | hope91824@gmail.com | GitHub | Portfolio | LinkedIn

PROFESSIONAL PROFILE

Support Engineer and Computing Science (Honours) graduate with experience spanning application support, software development, infrastructure and business automation. Resolve customer incidents through Jira, TeamViewer, logs and phone/email support; build web applications and internal tools that streamline business operations. Experienced in Software development, application support, Windows/Linux systems and stakeholder communication.

TECHNICAL SKILLS

Support & operations: Jira ticket management, incident troubleshooting, TeamViewer, phone/email support, system log analysis, escalation, stakeholder communication

Systems & business software: Linux/Ubuntu, Windows, server provisioning, VMware, Docker, WordPress, Xero quotations, Google Workspace / Apps Script

Development: JavaScript, TypeScript, Python, SQL, React, Next.js, Node.js, REST APIs, PostgreSQL, Firebase, Git/GitHub, HTML/CSS

PROFESSIONAL EXPERIENCE

Support Engineer | Ticketless Parking | *Nov 2024 – Present*

- Provide customer and application support for parking-management software and connected systems, investigating payment, ANPR/LPR, intercom and barrier incidents for councils, operators and property managers.
- Manage Jira service incidents end to end: reproduce issues, review logs, troubleshoot via TeamViewer and phone, coordinate field technicians and communicate resolutions to customers.
- Deliver software-development Jira tickets, including report-management UI enhancements and bug fixes; work with Git/GitHub on application changes.
- Configure and troubleshoot Windows/Linux servers, Ubuntu site PCs, VMware environments, remote-access services and production software.
- Helped build the Ticketless Parking WordPress corporate website; now act as its primary editor, implementing page, content and design updates.

Customer Service Representative | Point Parking | *Sep 2022 – Jan 2026*

- Handled around 50 phone, email and intercom enquiries daily; resolved customer issues, performed basic equipment troubleshooting and escalated operational incidents.

Head Teacher / Teaching Assistant | Code Camp | *Jan 2022 – Apr 2023*

- Taught programming fundamentals, explained technical concepts clearly and supported students and teaching assistants.

PROJECTS

TicketlessParking.com | WordPress corporate website

Helped build the company website and serve as primary editor for ongoing page, content and design changes. Website: https://ticketlessparking.com

PDF Proposal Generator | Google Apps Script, HTML/CSS, Handlebars, Puppeteer

Developed a guided proposal-generation tool that reduced manual document preparation time by over 60% (internal estimate).

Warehouse QR Scanning App | TypeScript, Firebase

Built a QR-code workflow that reduced manual warehouse data entry time by 70% (internal estimate).

Parking Booking & Payment Portal | Next.js, Node.js, PostgreSQL

Built a multi-tenant booking and payment platform with configurable parking locations, booking validation and online payment integration.

EDUCATION

University of Technology Sydney (UTS) | Bachelor of Computing Science (Honours), Enterprise Systems Development | 2024

First Class Honours | GPA 6.25/7 | WAM 82.56 (Distinction)
